ILLINOIS GAMING BOARD REQUIREMENT FOR MANUFACTURER PRE-CONFIGURED VIDEO GAMING TERMINAL PACKAGES

In an effort to streamline and accelerate the installation of licensed video gaming terminals (“VGTs”) in licensed locations, beginning September 6, 2012, the Illinois Gaming Board is requiring - until further notice - that licensed manufacturers and their distributors provide VGTs to licensed terminal operators and licensed locations in no more than five different manufacturer pre-configured packages, such that the VGTs arrive at the licensed locations with all settings pre-configured. As such, all settings including the payout percentages, game options, coin-in limit, etc. for each VGT must be preset prior to installation at a licensed location in accordance with the configurations of a selected manufacturer’s package of VGTs. Manufacturers are to provide the specifications for each of their five different pre-configured packages to the Illinois Gaming Board and Scientific Games International, Inc. (“Scientific Games”) on or before 5:00 p.m. on September 4, 2012. In addition, beginning September 6, 2012, for each VGT installation at a licensed location, the licensed terminal operator shall provide in advance to Scientific Games the name of the licensed manufacturer and the configuration package on the Scientific Games Video Game Terminal Configuration Form.

A handwritten signature in black ink, appearing to read "Mark Ostrowski".
